2.3 Introduction:

The Corporation of the Township of Hamilton (Township) is requesting proposals from qualified firms to develop a Commuter Cycling Master Plan (CCMP). The CCMP is intended to address the commuter cycling needs of the community for all non-motorized forms of transportation.

The CCMP will be consistent with the Township's Official Plan, published in 2012, and will consider the existing cycling networks and trails within the Township and propose new cycling infrastructure to create a comprehensive network. The CCMP will identify opportunities for improvements and provide short and long term prioritization and plans for the Township future cycling routes and trails.

2.4 Background

The Township requires the services of a consultant to develop a Commuter Cycling Master Plan that should include a high-level review and identification of roads and streets that could incorporate options for alternative travel modes, such as cycling lanes and widening of sidewalks and trails. A recognizable deficiency exists within the township for bicycle facilities as a means to increase passive recreation and commuter cycling opportunities for residents and visitors to work, live and play. The Oak Ridges Moraine, Rice Lake and Lake Ontario shoreline will be major elements in the natural environment and recreational linkages in the Township. Consideration for public access to these water bodies should be considered during this planning process.

2.5 Objective

Through the development of a Commuter Cycling Master Plan, the following objectives will be accomplished:

- Inventory existing and propose additional cycling routes, assets and facilities that ensure a cohesive connectivity
- Prioritize a list of recommendations for commuter cycling facilities and supports with cost and benefit analysis
- Propose a commuter cycling network that provides accessible and safe cycling systems for all ages that can be developed over time
- Address specific areas of concern within the Township, including barriers to increased ridership.
- Develop policies, programs and other initiatives to create a more cycling friendly community
- Provide clear and consistent guidelines, standards and specifications for cycling facilities to be incorporated into capital and operational improvements

2.6 Scope of Work

The general scope of this project consists of a planning process that identifies and prioritizes cycling improvements based on existing conditions, existing plans, and the needs of the cyclists. The outcome of the process will be:

- A clear vision and articulate goals for a truly active cycling community
- Strong and diverse public involvement
- Identification and prioritization of cycling improvements based on existing conditions, adopted plans and community feedback
- Strategies and performance measures that will guide the planning, funding and implementation of projects including creating a seamless network for cycling.
- Coordination with existing Northumberland County Cycling Master Plans, the Waterfront Trail and neighbouring Community Cycling or Active Transportation plans.

2.7 Meetings

- Initial start up meeting with Hamilton Township staff.
- Facilitate an Open House/Public Meeting with potential stakeholders, cyclists and residents.
- Meeting to present the draft plan to Township staff.
- Final presentation to Council.

2.8 Deliverables

- A complete Commuter Cycling Plan for the Township of Hamilton
- Completed review and assessment of existing cycling network elements.
- Completed review and assessment of all proposed cycling networks and prioritization of the proposed networks.

2.9 Evaluation of Proposal

An evaluation team comprised of staff members from Hamilton Township will review all proposals received and score them in relation to the evaluation criteria identified.
