

RFP Admin 2018-01 Addendum

Please find enclosed addendum#1. Please note that the Township answers to questions asked are below in red.

Requirements-specific questions:

- On page 12 2.4 Specifications Item number 1.2 - You are asking for Guidelines 2.0 Level AAA which will be restrictive in the design and how you present content. The AODA legislated requirements are Level AA. Can we respond to Level AA instead? **Yes**
- On page 14 2.4 Specifications Item number 1.10 – You are asking for an interactive map to display available commercial and industrial lands. Did you want this to simply be a content page with a link off or would you like it to be integrated in with MLS? Note, this option will require approval from your local reality board. **If it can be designed for either, we will be approaching MLS during the process**
- On page 15 2.4 Specifications Item number 2.3 We assume you are asking for AODA AA requirements. (typo?) **Yes, this is a typo**
- For Agendas/Minutes we assume a link off to <https://hamilton.civicweb.net/filepro/documents>
Yes, that is correct
- Do you need any integration into other systems (such as JD Edwards, CityView, CityWorks, Great Plains etc). **We will be looking for integration with Firepro for burn permits and Access E11**
- Does the Township have an idea for an end date (launch date) for the new website? **A launch date before the end of Q2 in 2019**
